

Corvallis, Oregon – CyberLock, Inc., a global leader in key-centric access control solutions is excited to announce that its newest CyberKey smart key, the CyberKey Blue 3, is a 2020 Govie Award winner. The Govie Awards honor outstanding government security products in a variety of categories. The CyberKey Blue 3 has been recognized in the *Locks and Locking Systems* Category.

The CyberKey Blue 3 is CyberLock's third-generation Bluetooth key and the most versatile CyberKey to date! With Bluetooth 5.0 technology, users can update access permissions from virtually anywhere using an Android or iOS app. Not only is the CyberKey Blue 3 compatible with CyberLock cylinders, it is also designed to open FlashLock access points, which makes it the ideal key for nearly any application. With support for dynamic features like Delayed Activation and Variable Temporary Access, CyberKey Blue 3 is an excellent choice for a mobile workforce!

CyberLock will be showcasing this innovative new key, along with a variety of other award-winning products at the 2020 ISC West Conference in Las Vegas. To learn more about CyberKey Blue 3, or CyberLock in general, stop by the CyberLock booth at ISC West or visit www.cyberlock.com.
