

Corvallis, Oregon (April 2021) – CyberLock, Inc., a global leader in key-centric access control solutions, wins a Govie Award for second generation CyberLock!

CyberLock, the leading supplier of key-centric access control solutions, is excited to announce that 2nd generation CyberLock cylinders have been awarded a Gold Security Today Govie award in the Locks and Locking Systems category. Each year, a panel of independent judges select winners of The Govies across a variety of categories. The Govies honor outstanding government security products and CyberLock is honored to be a recipient.

For over two decades, CyberLock cylinders have brought security and accountability to some of the harshest environments in the world. With the next generation of cylinders, CyberLock continues to push the limits of key-centric access control. The latest advancement offers AES-256 encryption between lock and key, the most robust encryption standard available today. Generation 2 cylinders retain CyberLock's trusted, sealed keyway for IP68-rated durability. Additionally, the Gen 2 cylinder achieved the highest ratings under European Standard EN15684 for durability, environmental resistance, and attack resistance. And with EN16864 Grade 5 corrosion resistance, CyberLock offers Gen 2 padlocks that can withstand virtually any outdoor environment.

CyberLock's durable lock body is well-suited to protect the next generation of key-centric components contained within. A faster processor provides a versatile foundation for future innovations while the ability to store up to 6500 of the most recent audit events gives organizations exceptional visibility over their assets. And with a significantly expanded Lost Key list, Gen 2 CyberLock cylinders provide precise key control for even the largest installations. For the ultimate in key-centric access control, pair a Gen 2 lock with one of CyberLock's six versatile second-generation CyberKey smart keys. Unlock all of these powerful, industry-leading features by enabling the new Gen 2 lock mode available in CyberAudit-Web 9.4.

CyberLock is a key-centric access control system designed to increase security, accountability, and key control. Based on a unique design of electronic lock cylinders and programmable smart keys, CyberLock solves security problems that no other system can.

CyberLock is proud to meet the needs of customers all over the world. With over 20 years in the security industry, CyberLock is a trusted name in access control.
