

Corvallis, Oregon (June 2021) – CyberLock, Inc., a global leader in key-centric access control solutions, wins a SIA New Product Showcase Award for CyberAudit-Web 9.4!

CyberLock, the leading supplier of key-centric access control solutions, is excited to announce that CyberAudit-Web 9.4 is the recipient of a Security Industry Association New Product Showcase Award in the *Key/Equipment Assets Management Solutions* category. Established in 1979, the New Product Showcase awards recognize innovative products, services, and solutions in electronic physical security. Technologies showcased through this program are used in the protection of life and property in residential, commercial and institutional settings. Each year, a panel of independent judges select winners across a variety of categories. The SIA New Product Showcase honors outstanding security products and CyberLock is honored to be a recipient of this distinguished award.

CyberLock is a key-centric access control system designed to increase security, accountability, and key control. Based on a unique design of electronic lock cylinders and programmable smart keys, CyberLock solves security problems that no other system can. For over two decades, CyberLock has brought precise access control to some of the harshest environments in the world through its vast range of high-security locks and keys.

CyberAudit-Web (CAW) is the software suite for managing CyberLock systems of all sizes. CAW provides an intuitive interface to assign keys, set expirations, monitor personnel, configure access schedules, and more. CyberAudit-Web allows users to manage three innovative access control technologies in one software platform, merging CyberLock electronic locks and keys, CyberLock Flex System hardwired devices, as well as CyberLock's FlashLock keyless access control system. CyberAudit-Web is easily accessed through web browsers on desktops, laptops, smartphones, or tablets.

The latest release, CAW 9.4, introduces impressive interface upgrades, new security enhancements, mobile geolocation capturing to enrich location graphics for access points, and powerful capabilities for 2nd generation CyberLock cylinders, including AES-256 encryption. Among other new features, a new Remote Door Access feature sends a text or email to quickly open hardwired doors from a mobile web browser.

CyberLock is proud to meet the needs of customers all over the world. With over 20 years in the security industry, CyberLock is a trusted name in access control. For more information on CyberAudit-Web 9.4, CyberLock products, or the CyberLock system in general, visit www.cyberlock.com or come see us at booth #7034 at ISC West.
