

Corvallis, Oregon (March 2022) – CyberLock, Inc., the global leader in key-centric access control, is proud to announce the Anchor Lås grade 6, protected shackle padlock. The Anchor Lås grade 6 protected shackle padlock is drill, attack, and tamper resistant, providing organizations with the power to extend access control to any location.

Paired with CyberLock’s CLTX-PL5WRD cylinder, the Anchor Lås grade 6 protected shackle padlock can be used for everything from storage room lockers to isolated utility stations. CyberLock’s latest Anchor Lås padlock includes a shackle guard for added security, reducing the risks associated with cutting the shackle. This heavy-duty padlock is just one of CyberLock’s multitude of padlock offerings, providing users with high security, wireless access control, even at remote locations.

CyberLock is a key-centric access control system designed to increase security, accountability and key control. Based on a unique design of electronic lock cylinders and programmable smart keys, CyberLock solves security problems that no other system can! The Anchor Lås grade 6 protected shackle padlock is compatible with all CyberKeys including Bluetooth and Wi-Fi CyberKeys.

CyberLock is proud to meet the needs of customers all over the world. With over 20 years in the security industry, CyberLock is a trusted name in access control. For more information on CyberLock’s Anchor Lås grade 6 protected shackle padlock or the CyberLock system in general, please visit www.cyberlock.com or give our friendly sales team a call at 541-738-5500.
