

# CyberLock<sup>®</sup>

Key Centric Access Control

**SOFTWARE &  
APPLICATIONS**

# Convenient, Powerful Security Management

CyberAudit-Web (CAW) is the powerful software suite for management of CyberLock systems. CAW, together with an array of mobile applications, grants the ability to assign keys, set expirations, add new cylinders, and create access schedules, in the office or on-the-go.

## FlashLock

**FlashLock Assistant** syncs with a CyberAudit-Web account to download and program FlashLocks and fobs for easy access management from your phone. **Flash Access** is an easy way to access FlashLocks for those requiring more frequent access.

## CyberAudit-Web

**CyberAudit Link** is a valuable tool in the vast CyberLock toolkit. It provides a complete communication path between a CyberKey and the CyberAudit-Web server to remotely update and download data. **CAW Connect** operates as a mobile CyberAudit-Web lite experience.

## Flex System

The **Flex Assistant** helps configure, diagnose, trouble shoot, update firmware, and monitor Flex II products in real time.

# What Can You Do with CyberAudit-Web?

## Accessibility

CAW can be accessed through web browsers on desktops, laptops, smartphones, or tablets.

## Geolocation

Create a custom map that includes the geographic location and an image of every lock in your system.

## Security

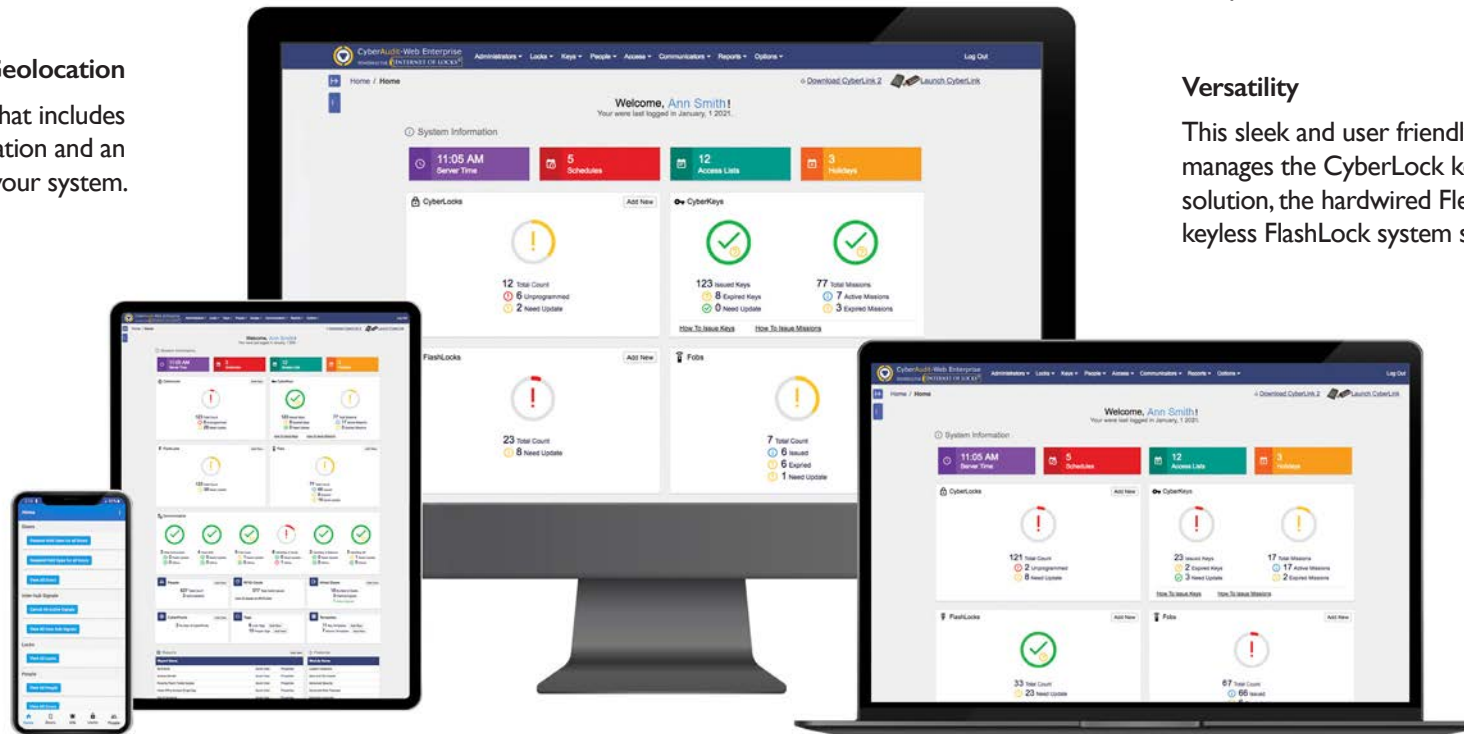

CyberAudit-Web supports AES-256 encryption between lock and key.

## Dynamic Tags

Automatically grant or revoke access permissions if the attributes of a person record or lock change.

## Versatility

This sleek and user friendly software manages the CyberLock key-centric solution, the hardwired Flex System, and keyless FlashLock system simultaneously.

## Management

Administrators can create customized access schedules for each individual key holder, or batch schedule entire departments.

## Accountability

System administrators can create and view custom audit reports on access activity and create automatic email notifications on specific events.

# How Does CyberAudit-Web Work For You?

## CyberAudit-Web

CyberAudit-Web (CAW) is CyberLock's award-winning management software. CAW can manage tens of thousands of keys and locks at once. CAW also has the ability to distribute responsibility across a hierarchy of administrators, making it easier to organize permissions to local resources.

## Dynamic

CyberAudit-Web has continued to evolve with new and innovative access control. CAW has earned its place as a recognized name in lock and key management solutions. New features are always being added to more easily and securely access your security.

## Features

CAW features a number of security and productivity enhancing capabilities. With mobile geolocation, users can capture an image and coordinates of every lock within their system. A man-trap feature allows conditional access based on a specific event or trigger.

## Mobile Support

By embracing a constantly changing mobile world, CyberAudit-Web has a series of mobile applications that bring some of its security power to smartphones. The mobile applications support every technology that CyberLock offers, allowing users the ability to communicate with keys and locks on-the-go.

CyberLock, Inc. is the leading supplier of key-centric access control systems. It is part of the Videx family of companies with roots dating back to 2000 when the first CyberLock branded locks and smart keys were introduced to the market.

Videx, Inc. has been designing and manufacturing innovative electronics since the company was founded in Corvallis, Oregon in 1979. Early products included display enhancement modules for Apple computers. In 1985, Videx entered the data collection industry with its first portable bar code scanner. Over the years, additional data collectors have been introduced, utilizing touch memory button and RFID tag technologies.

In 2013, CyberLock, Inc. was spun off as an independent company but maintains strong ties to Videx. The two companies continue to collaborate on future innovations.
