Flex II FlashReader

Part Number: FSR-FR01

CAW	Version 9.4 (or newer)
Enterprise	☑
Basic	☐

The Flex II FlashReader is an input device for the CyberLock Flex II wired access control system. It connects to a Flex II Controller or Door Expander to open an electric door strike. A user can gain access by presenting credentials such as RFID cards, or a cell phone using CyberLock's Flash technology. When using Flash technology credentials are presented via a user's smartphone display meaning no app is required and access can be facilitated with a text or email message.

Specifications

|	
Physical	Fiberglass Reinforced Nylon
