

Corvallis, Oregon (April 2023)—CyberLock, Inc., a global leader in key-centric access control solutions, is proud to win a *Security Today* Platinum Govie Award!

As a leading supplier of key-centric access control solutions, CyberLock is excited to announce that *Security Today* magazine awarded the CyberKey Go with a Platinum Govie Award in the Access Control Devices and Peripherals category. Each year, a panel of independent judges select Govie Award winners to honor outstanding government security products in a variety of categories.

CyberKey Go (CKR-GO) is an electronic key used to operate CyberLock cylinders. Designed for a mobile workforce, CKR-GO has a memory that contains encrypted access codes, a list of accessible locks, expiration dates, and schedules of authorized dates and times. Bluetooth 5.0 technology allows users to update access permissions from anywhere with a Bluetooth-enabled device. Replace CKR-GO's battery on the go and eliminate risk of the key battery dying during use.

High-security industries such as the water, energy, telecom, and transportation sectors of critical infrastructure utilize CKR-GO to monitor vast areas with a wide range of employees. The CKR-GO is auditable, helping administrators achieve complete control and visibility over their facilities, along with increasing accountability.

CyberLock is proud to meet the needs of customers all over the world. With over 20 years in the security industry, CyberLock is a trusted name in access control. For more information about CyberKey Go or the CyberLock access control system in general, visit www.cyberlock.com or give us a call at 541-738-5500.
