

Corvallis, Oregon (April 2023)—CyberLock, Inc., a global leader in key-centric access control solutions, is proud to win a *Security Today* Platinum Govie Award!

As a leading supplier of key-centric access control solutions, CyberLock is excited to announce that *Security Today* magazine awarded the CyberLock Blue padlock with a Platinum Govie Award in the Locks and Locking Systems category. Each year, a panel of independent judges select Govie Award winners to honor outstanding government security products in a variety of categories.

CyberLock Blue padlock is an IP68-rated keyless locking solution designed to protect critical assets in high-security environments, such as the water, energy, telecom, and transportation industries. Support for both hardware and software-based keyless credentials offers scheduled access control in online and offline locations, via your choice of the Cyber Access mobile app on Android or iOS, a CyberLock infrared fob, and select CyberKey smart keys.

Designed for a mobile workforce with various employees, subcontractors, and authorized visitors, CyberLock Blue ensures convenience through flexible access options suitable for all personnel and their individual duties. Access is authenticated using 256-bit AES CMAC challenge and response technology, delivering the highest-grade Bluetooth security on the market.

CyberLock is proud to meet the needs of customers all over the world. With over 20 years in the security industry, CyberLock is a trusted name in access control. For more information about CyberLock Blue or the CyberLock access control system in general, visit www.cyberlock.com or give us a call at 541-738-5500.
