

Las Vegas, NV (April 2025)—CyberLock, Inc., a global leader in key-centric access control solutions, was recognized by the Security Industry Association (SIA) as an awardee at the 2025 SIA New Products and Solutions (NPS) Awards, the flagship awards program presented in partnership with ISC West, recognizing innovative security products, services, and solutions.

CyberLock is a proud recipient of the NPS Merit Award, which recognizes an individual or company who, through their support of the SIA NPS Awards, demonstrates a commitment to the vision and mission of the program, contributes to its success and promotes the advancement of SIA and the security industry overall. CyberLock's President, Tammy Davis, spoke briefly at the award ceremony in acceptance, stating "Innovation is at the core of CyberLock's mission, and this award serves as a powerful validation of our commitment to advancing the access control market."

CyberLock's new intelligent key vault, the ValidiKey Pro, was also selected as the winner of the Key/Equipment Assets Management Solutions category. ValidiKey Pro is a versatile key management system that securely manages both CyberKey smart keys and mechanical keys, while providing administrators with detailed audit reports.

ValidiKey Pro stands out by accommodating various credential types, personalizing the key checkout experience for each user. For instance, users can employ the Cyber Access app on their mobile devices to check out keys via Bluetooth or NFC technology. An RFID card used for office access can also checkout a CyberKey for accessing CyberLock-secured storage units. Furthermore, contractors needing temporary access can receive a mission number to checkout a specific mechanical key. For added convenience, an infrared-capable CyberKey requires no additional credentials for fast, efficient key return. Unlike other systems, the ValidiKey Pro issues both smart keys and mechanical keys that can control and restrict access to doors, gates, and more when paired with CyberLock cylinders, filling a significant security gap in the market.

CyberLock is proud to meet the needs of customers all over the world. With over 25 years in the security industry, CyberLock is a trusted name in access control.
