

Corvallis, Oregon (May 2026)—CyberLock, Inc., an industry-leading access control company, is honored to receive two *Security Today* Govies awards. CyberLock is frequently recognized by *Security Today*, especially for its revolutionary key-centric access control system.

CyberLock is pleased to share that *Security Today* magazine has recognized CyberKey Blue 4 and Dynamic Audit Events with their Govies award. CyberKey Blue 4 won in *Security Today*'s Access Control Devices/Peripherals - Wireless category, and Dynamic Audit Events won in the Video Analytics category. *Security Today* annually considers manufacturers for their Govies award, highlighting products that display a substantial ability to improve government security.

CyberKey Blue 4, CyberLock's latest smart key, ushers in a new generation of CyberLock's Bluetooth key technology with improved features across the board. Bluetooth 5.2 provides greater range and connection stability, enhancing Blue 4's real-time capabilities. With a mobile device, users can exchange audit information and permissions with the software without delay. The addition of dual-factor verification brings Blue 4's Bluetooth capabilities to the next level, providing a higher level of protection for critical, high-security access points. With enhanced durability and a USB-C port, it is also CyberLock's most versatile CyberKey to date.

Dynamic Audit Events, a feature of CyberLock's Camera and NVR Integration Software Enhancement Module, joins Frigate NVR and CyberAudit-Web to bring the power of video clips to CyberLock reporting. When CyberAudit-Web detects predetermined events from the audit trails of CyberLock systems, it automatically retrieves the corresponding footage from Frigate NVR. With a comprehensive History page, single pane of glass Livestream page, and email/SMS notifications, organizations save time and energy—the video evidence essential to maintaining a secure system is at their fingertips.

With a trusted name built over 25 years in the security industry, CyberLock proudly serves customers around the world, meeting needs across numerous applications. For more information about CyberKey Blue 4, Dynamic Audit Events, or the CyberLock access control system in general, please visit www.cyberlock.com or give us a call at 541-738-5500.
